

GFCI Outlet Tester

Designed to check the integrity of the wiring for ground fault and standard outlets. Tests for proper function of GFCI outlets. Features Power Quality Monitor and Nuisance Trip Test.

FEATURES

30090 ⓘ

- ▶ Volts/Amps: 120V/15A
- ▶ Wiring Diagnostics - Checks Line Neutral and Ground Wire Integrity
- ▶ GFCI Tester - Inspects for proper operation and nuisance tripping. Separate tests for a 6mA ground fault and a 3mA ground fault
- ▶ Power Quality Monitor (PQM) - Identifies excessive voltage drop (approx. 6V) on the branch circuit by measuring the voltage between neutral and ground
